

ANGEL MARTINEZ

Software Engineer

4+ years of experience building TypeScript and React applications for SaaS platforms, with a focus on frontend architecture, legacy modernization, API integrations, and reliable user-facing workflows.

EXPERIENCE

Software Engineer @ MedTrainer

AUG 2023 - PRESENT

- Build and maintain React-based modules for user management and internal integration workflows in a healthcare compliance SaaS platform.
- Revamped a legacy PHP module into a modern React experience, improving usability and maintainability.
- Improve performance and resolve production issues by monitoring Sentry events and frontend reliability metrics.
- Collaborate with product managers, product designers, and backend engineers to define requirements and ship platform improvements.

Front-end Developer @ Never8

MAR 2022 - JUL 2023

- Maintained and improved a pharmacy POS-style platform for internal support teams.
- Integrated Magento and Google APIs into frontend flows.
- Fixed frontend performance issues caused by repeated requests, unnecessary re-renders, and inefficient memoization.

Front-end Developer @ EDteam

JUL 2021 - MAR 2022

- Maintained the legacy frontend codebase of an e-learning platform.
- Served as a main frontend developer in the platform rebuild using TypeScript, Next.js, and React Query.
- Helped define frontend architecture, reusable patterns, folder structure, and development standards.
- Collaborated closely with designers and product managers to implement Figma-based interfaces and deliver product features.

EDUCATION

Universidad Americana del Noreste — *Software Engineering*

COMPLETED DEC 2025

Nava, Coahuila, México

CORE STRENGTHS

Performance optimization

Cross-functional collaboration

TypeScript-first development

Scalable frontend architecture

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, GraphQL, Python, and SQL

Libraries / Frameworks: React, Next.js, React Query, NestJS, Prisma, Material UI, and Tailwind

Databases: MySQL, PostgreSQL

Tools / Platforms: Docker, Git, GitHub Actions, Sentry, and Vercel

LANGUAGES

Spanish - Native

English - B2
